Career Objective

Passionate Full Stack Web Developer and founder of MGZon AI, a global AI-driven e-commerce platform inspired by Amazon and Shopify, providing personalized shopping experiences and dedicated vendor stores targeting international markets. With over 5 years of programming experience, I specialize in TypeScript, MongoDB, React, Django, and Firebase. I developed MGpay, an internal payment gateway integrated with Stripe and PayPal, enabling seamless vendor payouts and global transactions. Currently, I am working on registering MGZon AI as a U.S.-based company and building partnerships with warehouses in the USA, Canada, and China to establish a robust e-commerce ecosystem. My goal is to drive innovation, empower vendors, and maximize client success through scalable solutions.

Education

Bachelor of Information Systems 2020–2023
Faculty of Computers and Information, Alexandria University, Egypt
Grade: Very Good

Work Experience

Founder & Lead Developer, MGZon AI 2023–Present

- Founded MGZon AI, a next-generation e-commerce platform with AI-driven personalization, offering dedicated stores for vendors and targeting global markets.
- Developed MGpay, an internal payment gateway integrated with Stripe (for international markets) and PayPal (for Arab and global markets), enabling vendors to manage payouts seamlessly or use their own PayPal/Stripe accounts.
- Built integrations for payment, warehouse management, dropshipping, and marketing, with operations supported by warehouses in the USA, Canada, and China under U.S. licenses.
- Designed scalable backend systems using TypeScript, MongoDB, Django, and Firebase, ensuring seamless interactions for vendors, users, and suppliers.
- Spearheaded efforts to register MGZon AI as a U.S.-based company, enhancing global credibility and operational capacity.
- Leveraged strong persuasion and client acquisition skills to drive sales and maximize profitability, achieving significant vendor engagement.

Freelance Developer (Remote) 2020–2023

- Developed e-commerce platforms with API integrations for payment gateways and dynamic systems.
- Utilized Linux systems and terminal-based workflows for efficient development and deployment.
- Focused on scalability, user experience, and system optimization in all projects.

Unpaid Internship, USBank (Online) 2022

- Contributed to financial systems and online banking operations by integrating APIs and conducting system testing in a remote environment.
- Gained experience in secure financial system development and operational efficiency.

Skills

- **Technical Skills:**
 - HTML5, CSS3, JavaScript, TypeScript
 - MongoDB, React, Node.js, Python, Django
 - Docker, PostgreSQL, SQL, Git, Linux
 - PHP, UX/UI Design, API Integration
 - Firebase, Search Engine Optimization (SEO)
